UMBRIANO 80MM 4X12" (SO MIDNIGHT SKY)

The granite-like appearance of Umbriano makes it a popular choice for sleek, modern landscape paving projects. It's unique, mottled surface is achieved with ColorFusion™ Technology that randomly disperses rich color and granite particles. This creates a natural look with a non-slip texture. Umbriano is factory-sealed during the manufacturing process with EasyClean™, an integral surface protection from stains. These features make it ideal for use in high-traffic commercial and residential projects and highly compatible with Umbriano coping and wall products.
